The Digital Skills for All (DS4All) Approach

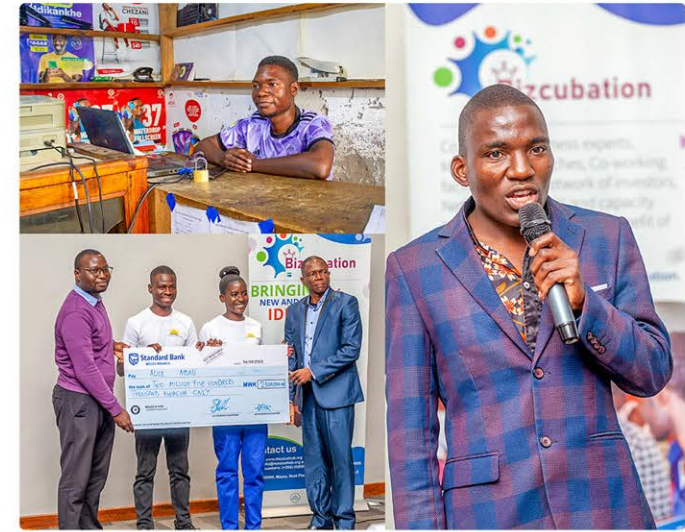

1. MILE Program

MILE is a program that supports young people access digital skills that support income generation and are also aimed towards building a digital economy.

Young men and women through the program acquire knowledge and skills such as; digital marketing, videography and photography, data management, website designing, End User computing and computer programming.

The program also seeks to build a community of responsible tech users through awareness and media workshops.

2. Bizcubation

A three months incubation program that supports start-ups, founders launch and grow their businesses and business models that are guaranteed to make money and are ready to launch.

Bizcubation is Mzuzu E-hub's flagship program and is open to men and women alike.

The program supports two classes of entrepreneurs; Livelihood Sustaining enterprises and Dynamic Enterprises founded by youths between 18 – 35 years old and in operation for less than 3 years.
